

**IDAHO BOARD OF SCALING PRACTICES
SPRING 2009
LOG SCALING LICENSE EXAMINATION**

A **Log Scaling License Examination** will be held on **April 16, 2009**, at the Potlatch Corporation log yard, St. Maries (see map on reverse side). The examination will begin at 7:00 a.m. (PDT) on Thursday morning, April 16. Individuals not completing the exam by end-of-day Thursday will be allowed to finish on Friday morning (April 17).

This examination is open to any person wishing to apply for certification as an Idaho licensed log scaler, in compliance with provisions of Idaho log scaling laws. Currently licensed scalers may scale the exam logs for license renewal purposes, or are welcome to scale the exam logs for a check scale (no registration fee for currently licensed scalers).

ALL PERSONS PLANNING TO ATTEND THIS EXAMINATION SHOULD PRE-REGISTER WITH THE BOARD'S OFFICE. A COMPLETED APPLICATION FORM AND \$25 FEE ARE GENERALLY REQUIRED FOR EXAM REGISTRATION.

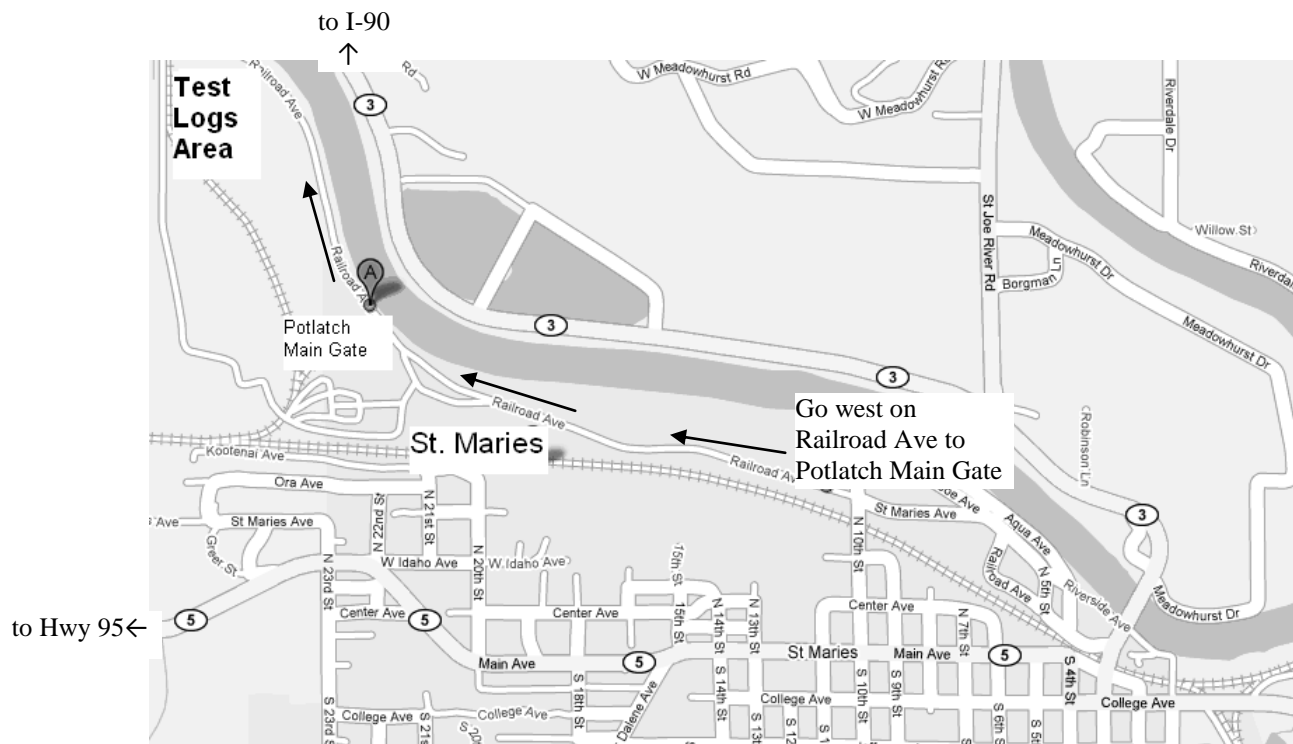

REGISTRATION: Application form and fee requirements vary depending on whether you are a new applicant, previously tested applicant, the holder of a temporary permit or apprenticeship certificate, a current or formerly licensed scaler. When you pre-register with our office, we can inform you of the requirements for your particular situation. The sooner the better, but please contact us no later than Friday, April 10, to allow ample time for processing.

EXAMINATION PROCESS: New applicants (and some previously tested applicants or formerly licensed scalers) must take and pass a written exam before proceeding to the practical log scaling portion of the license examination. The practical exam requires scaling approximately 200 logs. Scale data is determined and recorded on forms that we will provide at the testing site. Your species identification, gross scale, and net scale must be within allowable limits of variation to pass the practical exam. *Only for scalers holding a current and valid Idaho standard Log Scaler's License – If you are scaling the exam logs for a check scale, you have the option of determining & recording scale data on a "handheld" recording device provided you furnish us with a printout on-site and delete the test data before leaving the exam site. Your printout must provide the appropriate species I.D.*

SCALING EQUIPMENT: For the written exam you are allowed to use a Coconino Scribner decimal "C" scalestick, log volume card, and/or a simple calculator (no "scale recording devices"). For the practical exam you will need to bring a hardhat and provide the appropriate tools – scalestick, length tape, hand tape, hatchet or spud, calipers, etc. You may also use your scaling handbook, other reference material, calculator, etc. (but no "handheld" recording device, unless you are currently an Idaho licensed scaler holding a standard Log Scaler's License).

Map showing test site location at Potlatch Corporation, St. Maries:

FROM HIGHWAY 95: Turn east onto Highway 5 in Plummer, travel approximately 18 miles to St. Maries. Turn left (north) on 10th street (just before Les Schwab) to Railroad Ave, turn left (west) on Railroad Avenue and continue to the guard house and check in with the guard.

FROM INTERSTATE 90: Turn south on Highway 3 at the Rose Lake junction, continue on to St. Maries. As you enter St. Maries, you will cross over the St. Joe River, turn right (west) on Railroad avenue (the first street past the bridge), and continue to the guard house and check in with the guard.

From the Potlatch Corporation Main Gate follow the road along the levee to the test logs area. We will conduct sign-in and orientation at the test site, at 7:00 a.m. (Pacific Time) on Thursday, April 16.

1. **In the event you have not completed pre-registration with the Board's office, remember to bring a completed & notarized application form, and the \$25 fee.**
2. **Remember to bring a hardhat, suitable clothing, and all your own scaling gear.**
